## ABSTRACT:

PROBLEM TO BE SOLVED: To improve security and to reduce the occurrence of an artificial mistake caused by manual work.

SOLUTION: When a fund transfer application is taken into a fund transfer application receiving device installed in a credit company, a reading part 10 for the fund transfer application receiving device reads information written in the fund transfer application. A digital processing part 21 makes it into digital data and a code giving part 22 gives the codes of a financial facility and a branch office to it. An image preparing part 23 prepares image data on information read by the part 10. The image data prepared by the part 23 are printed out by a printer 50 to be sent to the financial facility.
